

Qualcomm Licensing Commitment Regarding IEEE 802.11be

August 21, 2024

For the reasons set forth in Qualcomm's Licensing Commitment Regarding 802.11az dated November 7, 2022, Qualcomm has submitted a negative Letter of Assurance ("LOA") for the 802.11be specification. Because IEEE does not permit a patent holder to explain its licensing intentions in an LOA, Qualcomm hereby commits to license the Essential Patent Claims listed in the negative LOA for 802.11be in accordance with the version of the IEEE-SA Standards Board Bylaws that came into effect on May 1, 2007 ("2007 Policy"). This LOA submission is not an indication of any change to Qualcomm's longstanding licensing practices with respect to 802.11 standards.
