

# SNAPDRAGON SUMMIT

## Partner Quote Sheet

### HP

“I have never been more excited about PC innovation than I am today. We have entered the age of AI and this will unleash incredible innovation across the category. At HP, we are about to fundamentally change what the PC is and what it can do,” said Enrique Lores, President & CEO, HP Inc. “The ability to run generative AI applications locally will enable more personalized experiences, improve latency, provide better security and privacy protections, and reduce costs. And all of this is good news for the customers we serve because it is going to make them more productive than ever before. I am grateful to partner with Qualcomm Technologies as we enter this new era of computing, and I am excited about the work we are doing together to create amazing new experiences.”

### Lenovo

“Among the best processors, Snapdragon® X Elite creates best-in-class, AI-accelerated experiences for mobile computing. With this platform, Qualcomm Technologies is also delivering a whole new level of powerful and intelligent Windows AI capabilities,” said Yang Yuanqing, Chairman & CEO, Lenovo. “Our consumers and commercial customers will be able to utilize this powerful performance, long battery life, and on-device generative AI to enjoy the best experience and achieve the highest productivity. Together, Lenovo and Qualcomm Technologies will bring the next generation of AI experiences to our users.”

### Microsoft

“Microsoft and Qualcomm Technologies have a long history together, and that collaboration has only become stronger over the years. We are building Windows to be the destination for the best AI experiences, and powerful NPUs, like the ones we’re creating, work with our Windows 11 AI ecosystem to change the way people experience AI for the better,” said Pavan Davaluri, Corporate Vice President,

Windows & Devices, Microsoft. “As we look forward to the future with Snapdragon® X Elite and Windows 11, we will deliver faster and better performance, and emulation will get more efficient.”

At Snapdragon Summit 2023, Qualcomm President & CEO Cristiano Amon had the opportunity to speak with **Microsoft** Chairman & CEO Satya Nadella about a variety of topics, including the two companies’ long collaboration, generative AI, and the evolution of the Windows PC experience. Watch [here](#).
