

THE POWER TO MOVE YOUR BUSINESS FORWARD

The unrivaled power, battery life, and AI of the new Snapdragon® X Elite processor can't be overstated. In fact, it's setting the standard for the all-new Copilot+ PCs and represents the biggest shift in Windows PC architecture in over 50 years.

Incredible performance

Breeze through complex tasks like video edits, image generation, and file exports without missing a beat—while your PC stays cool, thanks to thermal efficiency.¹ Add to that the world's fastest NPU for laptops that unlocks powerful AI capabilities on the device, and Snapdragon X Elite processors are poised to keep you well ahead of the curve, now and into the future.

**Unlock productivity
with the blazing-fast
Oryon™ CPU**

- 54% faster CPU than other PCs¹
- Faster than leading x86 CPU
- Best-in-class CPU performance

**Create stunning
graphics with an
integrated Adreno™ GPU**

- 36% faster GPU than other PCs¹
- Matches competitors' peak GPU performance at 74% less power
- Support for up to three 4K external displays

**Experience powerful AI
capabilities with a super-
charged Hexagon™ NPU**

- Up to 4.5x faster AI performance/NPU processing power than competitors
- Leading NPU performance in its class (45 TOPS)
- Best-in-class speed for on-device LLMs

Unrivalled power, battery life, and AI

What's even better than game-changing performance? The fact that workers can take this power with them on the go, thanks to unrivalled efficiency and incomparable battery life. The Snapdragon X Elite processor also:

- Boasts multi-day battery life²
- Delivers lightning-fast 5G and Wi-Fi 7
- Gets up to 20+ hours of continuous video playback.³

Across-the-board results

Anyone in your organization could benefit, including:

- Execs who want the power of Macs without having to change to an unfamiliar OS
- Knowledge workers who want the power and battery life to work anywhere and on the go
- Content creators who want the horsepower needed to work across a multitude of current and future apps
- CISOs who want to shield sensitive company data from evolving cyberthreats
- IT teams who want to spend less time configuring, deploying, and managing devices
- Businesses that want devices that excel at performance, allowing for continued growth

Where can you find Snapdragon X Elite?

Considering the power, performance, and efficiency, it's no wonder the biggest brands are building Copilot+ PCs with Snapdragon X Elite processors.

What now?

Learn how the most powerful, intelligent, and efficient platform ever created for Windows can future-proof your business.

Microsoft, Microsoft Copilot, and Windows are trademarks of the Microsoft group of companies.

Copilot in Windows (in preview) is available in select global markets and will be rolled out to additional markets over time. Copilot with commercial data protection is available at no additional cost for users with an Entra ID with an enabled, eligible Microsoft 365 license.

1. CPU Performance is based on Geekbench v6.2 Single-Thread on Windows 11 OS run in March 2024. Snapdragon X Elite was tested using a Qualcomm reference design on Windows 11 OS. The Intel Core Ultra 7 155H (16 core) was tested using an Asus Zenbook 14 OLED (UX3405) laptop, on Windows 11. Maximum performance reflected by Intel Core Ultra 7 155H represents maximum achievable results in given platforms under unconstrained PL1/PL2 settings and no thermal.

2. Battery life varies significantly based on device, settings, usage, and other factors.

3. Based on data provided by OEMs. Visit each OEM website for additional details.

Device features and functionality may vary based on OEM design.
