

**Gautam Sheoran**  
Senior Vice President and General Manager,  
Connectivity, Broadband & Networking

Gautam Sheoran serves as Senior Vice President and General Manager of the Connectivity, Broadband & Networking product lines for Qualcomm Technologies Inc. In this role, Sheoran leads the Wireless Infrastructure and Networking (WIN), Mobile & Client Connectivity (MCC), and Wireless Broadband & Communications (WBC) product lines and oversees roadmap, and execution.

Sheoran and his team are responsible for driving growth and innovation in connectivity, broadband, network processing, and edge AI. This includes a comprehensive portfolio of technologies and products that span Client and Infrastructure Wi-Fi, Ultra-Wide Band, Bluetooth, Thread, Fiber, Ethernet, and Wireless Cellular products including 5G chipsets.

Sheoran has more than 25 years of experience in the wireless communications industry. Since joining the company in 2004, he has held various positions in engineering, marketing, and product management defining, executing, and managing communication products and business.

Sheoran holds a Bachelor of Science in Computer Science from Pune University, India; a Master of Science in Electrical & Computer Engineering from Georgia Tech, Atlanta; and an MBA from the University of California, Los Angeles.
