

SECURE CDMA WIRELESS COMMUNICATIONS

- > Fully Integrated—Multi-Band
- > End-to-End Voice & Data Security
- > Operates Over Commercial CDMA Networks

MOBILE SECURE COMMUNICATIONS DESIGNED FOR EXECUTIVE CONVENIENCE

The QUALCOMM Executive Car Kit, upon Government certification* packages the latest end-to-end security features of the QSec-2700 phone into a platform specifically designed for in-vehicle use by decision makers on-the-go. This phone gives you the flexibility to send and receive Type 1 secure or clear voice and data, and the sleek, stylized design provides the comfort and convenience of a desk phone in a mobile environment. The phone is easy to install using industry standard mounting elements in all vehicles. Most importantly, the phone operates over existing 3G CDMA2000®1X commercial networks, which provide excellent coverage and fast data speeds.

The Executive Car Kit:

- Integrates secure mobile communications into a vehicle-ready platform
- Requires no add-on module; security is integral to the phone
- Interoperates with current Future Narrowband Digital Terminal (FNBTD) compliant devices
- Requires no security token for secure voice communications
- Operates on vehicle power

*Executive Car Kit presently undergoing Government certification.

QSec®-2700 Executive Car Kit

Executive Car Phone Kit Includes

- QSec-2700 Type 1 Secure Dual Band phone for 800/1900MHz CDMA cellular networks
- Power harness
