Featuring the latest in mobile technology

Capturing cinema grade videos

Built with new camera and graphics architectures that are designed to allow mobile users to capture their videos in cinema-grade quality and have access to a billion shades of colors. Snapdragon 845 mobile platform is the first to feature 64x more color information via Ultra HD premium video capture.

Truly immersive experiences

Blur the lines between the physical and virtual worlds for VR headsets by enabling XR users to detect walls and objects in any room. The newly architected Adreno 630 is the first to enable Room-Scale VR for mobile XR headsets with six degrees of freedom (6DoF) and Simultaneous Localization and Mapping (SLAM).

User experiences powered by Artificial Intelligence Engine (AIE)

Snapdragon 3rd generation AI Platform is on-device intelligence that will transform your mobile device into a better personal assistant using voice, better camera using enhanced features like camera bokeh, more true to life XR, gaming, and long lasting battery life.

Vault-like security

Enjoy peace of mind knowing that your device is safeguarded with vault-like security. Your biometric information, like fingerprint, iris, voice, and facial data, as well as mobile payments, are now in a safer place.

Globalizing the "wireless fiber" experience

With more spectrum flexibility than ever before, the integrated Snapdragon X20 modem is designed to bring improved app performance and lightning fast access to cloud storage to more users around the world. Experience the same blazing speeds indoors with 11ad multi-gigabit Wi-Fi and broadcast audio to ear buds, speakers and other devices in a power efficient way.
