

Qualcomm® QCS8250 Processor

The premium-tier QCS8250 processor is designed to help you deliver maximum performance for compute-intensive camera and Edge AI applications with Wi-Fi 6 and 5G for the Internet of Things (IoT).

The QCS8250 brings the latest technologies in a highly integrated processor that delivers maximum performance with exceptional features. This processor is purpose-built for enterprise and commercial IoT applications such as video collaboration, smart camera, connected healthcare, smart retail, and more.

The QCS8250 offers a powerful heterogeneous computing architecture coupled with the Qualcomm® AI Engine to efficiently run complex AI and deep learning workloads and on-device edge inferencing at incredibly low power.

The processor also offers a powerful image signal processor (ISP) with support for up to seven concurrent cameras, or up to 24 video streaming cameras, a dedicated computer vision engine for enhanced video analytics (EVA), as well as the new Qualcomm® Hexagon™ Tensor Accelerator (HTA). With support for 4G/5G and Wi-Fi 6 connectivity speeds via a companion module, the QCS8250 represents the ultimate set of features for developing premium IoT devices and enterprise-grade solutions.

The dedicated Engine for Video Analytics (EVA) provides enhancement for computer vision (CV) applications with reduced latencies for real time image processing, freeing up the DSP, GPU, and CPU capacity for other critical AI applications.

To further facilitate fast and cost-effective development, Qualcomm Technologies, Inc. has collaborated with ODMs to enable those ODMs to provide a variety of development kits, tools, and reference devices, as well as ISVs to support those ISVs to provide solutions that address various industry segments.

Highlights

Superior camera support

Feature-packed with an advanced Image Quality (IQ) and support for up to 7 cameras running concurrent AI models. Also, support for up to three 4K displays with independent content plus intelligent zoom in and out. Up to 8K video encode/decode, and up to 64 megapixel photo capture and video capturing for exception high-definition videos.

Powerful Edge AI and video analytics

This processor contains a dedicated CV hardware block and HTA delivering a whopping 15 TOPS of AI performance for compute-intensive enterprise and commercial IoT applications. Heterogenous computing of sensor inputs from camera, audio, Bluetooth® wireless technology, and hubs deliver a power-optimized, enterprise-grade experience.

Supports 5G and Wi-Fi 6

Supporting the broadest set of wired and wireless connectivity options including 5G mmWave and sub-6 GHz (up to 7.5 Gbps), Wi-Fi 6, and Bluetooth 5.1 for a variety of enterprise and commercial IoT applications. Also support for popular cloud applications for distributed AI model use cases.

Wide range of interfaces and peripherals support

Rich set of interfaces such as 2x USB 3.1, Type-C with DisplayPort, MIPI-CSI/DSI, PCIe (3-lane), and memory support interfaces for LPDDR4x/LPDDR5—suited for industrial and commercial IoT applications.

Flexible design options to accelerate time to commercialization

To give you flexibility in your design, our ecosystem partners offer full form factor reference designs, development board offerings for prototyping, or off-the-shelf system-on-module (SoM) solutions, to processor-onboard designs—all to enable ease of development and accelerate commercialization and scale.

Expected Product Longevity: February 2036

The QCS8250 processor is a part of the Product Longevity Program for Qualcomm IoT Portfolio. These products are developed and engineered with product longevity and durability in mind, helping to bring stability to our customer product designs. Product longevity dates are subject to change without notice.

QCS8250 Target Applications

- Connected Cameras
- Retail Self Checkout
- Video Collaboration
- Digital Signage
- Fleet Management
- Healthcare

Qualcomm

QCS8250

Features

- Qualcomm® Adreno™ 650 GPU with improved¹ GPU performance and power efficiency
- Native 8-bit integer support for efficient GPU DNN
- Hexagon DSP with quad Hexagon Vector eXtensions (HVX) V66Q, 1.5 GHz, for machine learning, integrated DNN for advanced VA and Qualcomm® Neural Processing SDK framework
- Qualcomm® Kryo™ 585 CPU with 4x Kryo Gold (2.85 GHz) + 4x Kryo Silver (1.8 GHz) with 4 MB L3 cache
- Camera: Dual 14-bit Qualcomm Spectra™ 480 ISP support 64 MP single camera capture
- Support for up to 24 cameras, or seven concurrent cameras
- Superior image quality in zzHDR, video denoising, mid/low frequency denoising, lens shading correction, video super resolution
- Supports triple 4K display
- Video/display: Concurrent UHD encode/decode, 3x DisplayPort, MIPI-DSI
- Unparallel video processing @ up to 4K240 decode/4K120 encode, multiple video codecs
- Computer Vision: CVP 2.0 for improved video de-noising, digital video stabilization and image correction adjustment
- NPU (Neural Processing Unit) for performance and always-on Neural Network (NN) use cases
- Audio: Multi-mic, source tracking, ECNS, voice activation
- Support for 4G/5G mmWave and sub-6 GHz (up to 7.5 Gbps)
- Support for 2x2 11ax 80 MHz for faster downloads

Ordering Information

Product	Part Numbers
QCS8250 (LPDDR5 PoP)	QCS-8250-0-MPSP1099
QCS8250 (LPDDR4 PoP)	QCS-8250-1-MPSP1017

Please check part numbers for accuracy before ordering

Block Diagram

² Supported with a companion module

Specifications

Process Node	7 nm FFP
Package	12.4 x 12.7 mm LP4, 12.4 x 14 mm LP5 MEP
CPU	Kryo 585, Octa-core 64-bit Arm® v8-M processor
Memory	Quad-channel PoP high speed LPDDR5/LPDDR4x SDRAM up to 2750 MHz (LPDDR5)
Modem	5G modem attachment with support for sub-6 GHz and mmWave
GPU	Adreno GPU 650
Compute DSP	Hexagon DSP with Quad HVX V66Q, 1.5 GHz
Machine Learning	Dedicated NPU 230
Camera	Dual ISP: 64 MP @ 30 fps ZSL
Connectivity	WLAN: 2x2 802.11ax with DBS, Bluetooth 5.1
Display	Adreno 995 DPU, supports up to three 4K display, 2x 4-Lane DSI, DisplayPort and Miracast support
Video	Decode: 8K60/4K240; Encode: 8K30/4K120
Security	Dedicated SPU with Improved Crypto
I/O Storage	UFS 3.0 gear 4 (2 lane) + UFS 2.1, SD 3.0, Two USB 3.1 ports, support Type-C with DisplayPort v1.4 in one port
Operating System	Android 10
