

Interface Control Document Subscribers

QTI ICD subscribers may use ICD internally to develop products (and in some cases, manufacture products) for the sole purpose of collecting, sending and parsing messages, commands, and packets via any available interface on an end device that incorporates a QTI application-specific integrated circuit (ASIC).

For full use rights, ICD recipients should see their specific agreement with QTI.

Debug messages and logs generated by and/or from QTI chipsets are considered QTI confidential and proprietary information. Unless authorized by QTI under a legal agreement between the parties, companies and users are not legally authorized to decode debug messages and logs generated by and/or from QTI chipsets.

ICD Subscription Overview

- Access to QTI ICD is conditional, based on:
 - An executed agreement between QTI and recipient for the ICD.
 - QTI collection of a yearly subscription fee.
- This document only reflects active (i.e., paid) subscribers.
- ICD is categorized by technology and each technology covered in an ICD must be individually subscribed.
 - This document only lists ICD technologies that have been introduced after 2018, i.e., 5G, V2X.
 - GSM, CDMA, WCDMA, and LTE technology subscription information is not presented in this document.
- At the request of an ICD recipient, QTI will provide written confirmation to the recipient of their current subscription status.
