

Travis Lanier

Senior Director, Product Management Qualcomm Technologies, Inc.

Year 2013

Battery

3000mAH

Camera

Single camera

Resolution

1080p/FHD

Audio

Audio jack

Network

4G LTE, CAT 4 150Mbps Minimal antennas

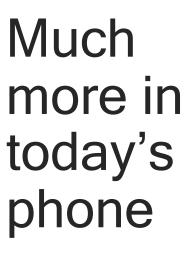

DISPLAY

5 inch screen

WIFI

802.11 ac

Battery

4000mAH

Camera

Multiple cameras

Depth sensing for security and IQ

Audio

Audio/Microphones 4+

Network

4G LTE, CAT 18
Gigabit LTE
Sophisticated antennas

DISPLAY

Edge-to-edge Fingerprint/
6+ inch displays Under Display
2K+ displays HDR Display

WIFI

802.11 ac/ad

Additional features

More Graphics Horsepower Quick Charge

App Performance Then: Simple/ Single Function

Phone Calls
Messaging/SMS
Email
Alarms/Calendar

Multimedia

MP3 playback
Camera
Local Photos & Files

Social Media

Browser/Search Bar

Location

Maps

App Performance Now:

Increased Performance demands

Communications

Video Chat Visual email Weibo

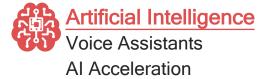

Multimedia

Video Capture
Photo/Video editing
Console Gaming
XR

Social Media

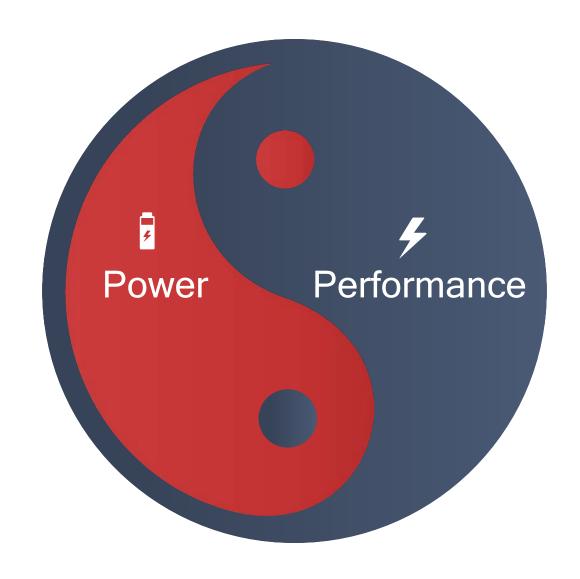

WeChat Facebook Instagram Snapchat

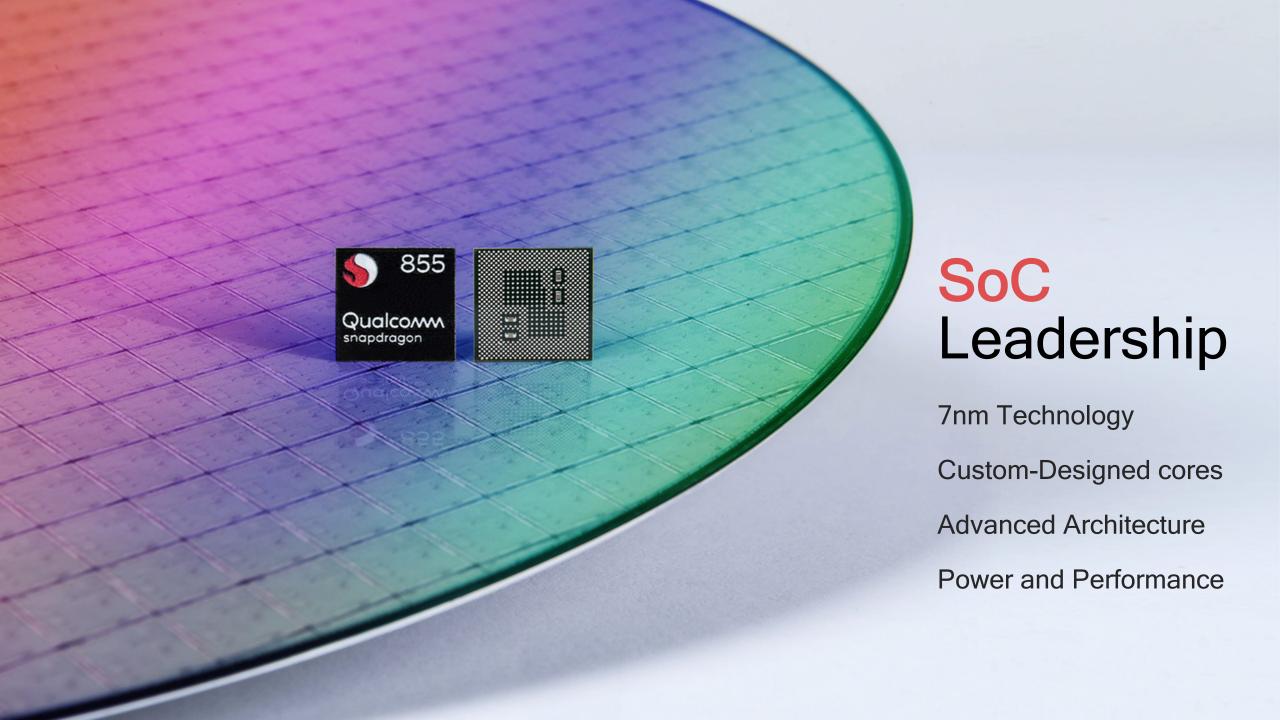

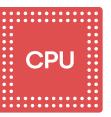

Power and performance balance

Our design philosophy

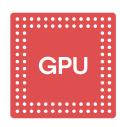

45% Faster CPU

20% Faster GPU

Adreno 640

Qualcomm designed GPU

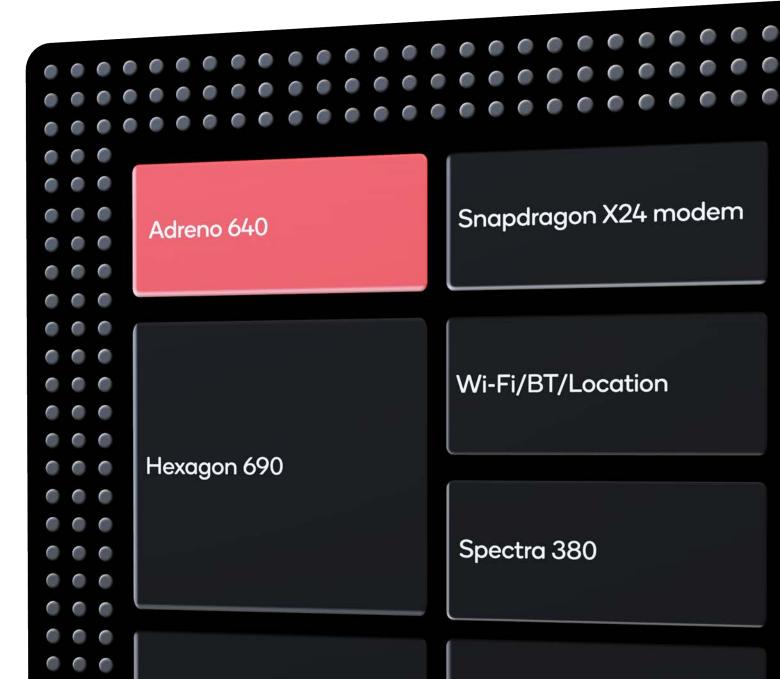

20% faster graphics rendering

Industry leader in performance/watt

- Integrated microcontroller for power management
- Lowest driver overhead for less CPU power

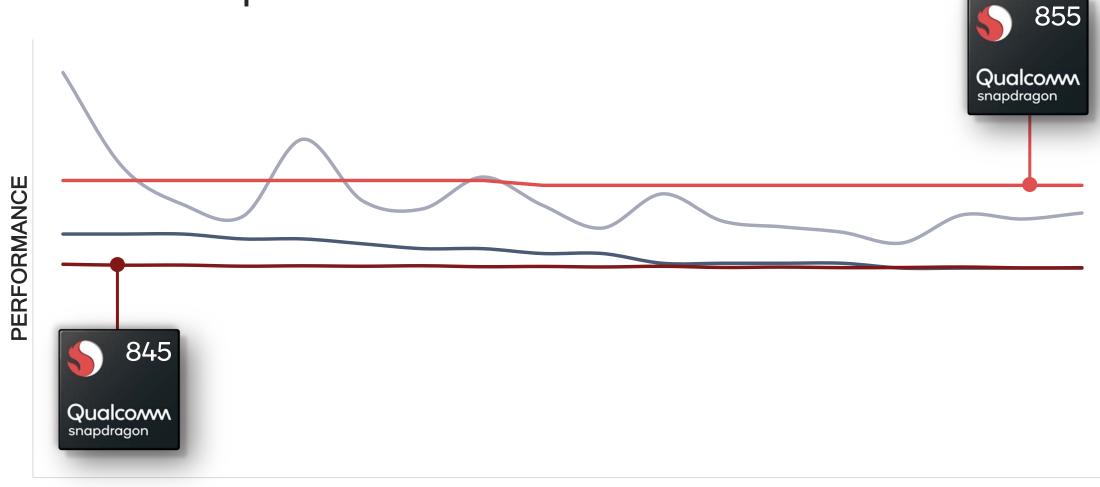

Industry leader in graphics feature set

First to mobile with Vulkan 1.1

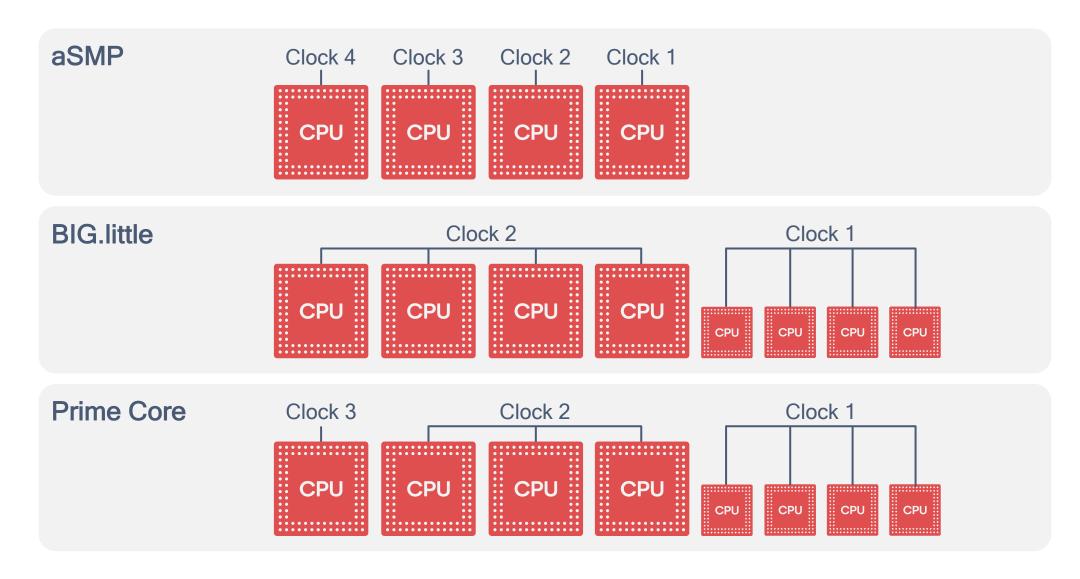

Sustained Gaming Performance

Versus Competitors 7nm

Kryo 485: Introducing Prime Core

Kryo 485

Built on Arm Cortex Technology

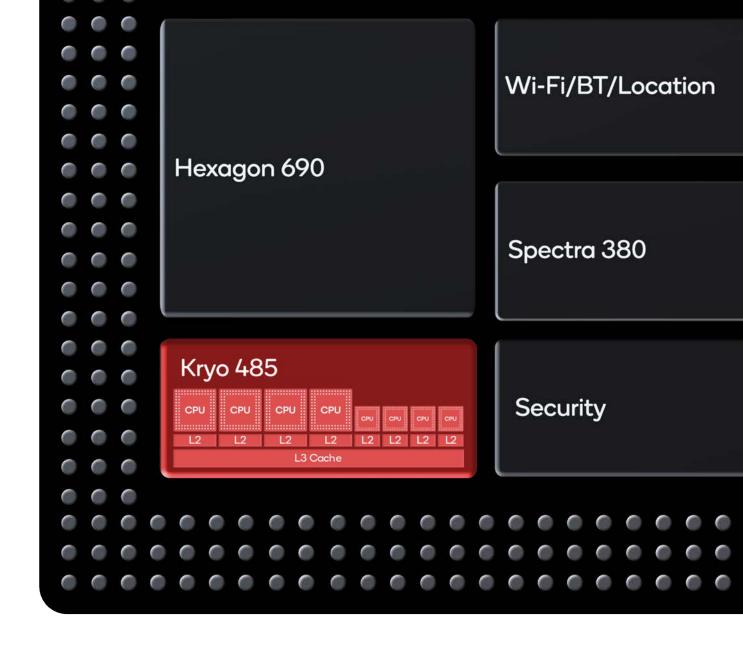

45% performance uplift

1 x 2.84GHz Prime Core 3 x 2.42GHz Performance Cores 4 x 1.80GHZ Efficiency Cores

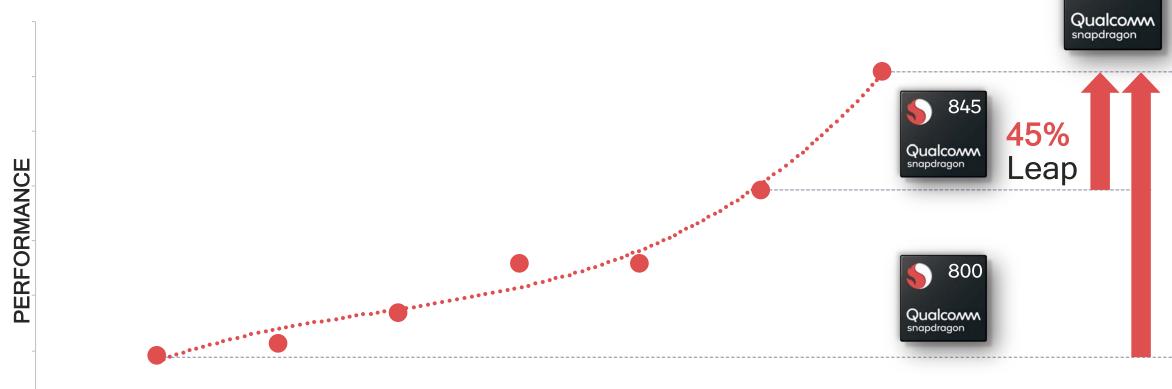

Customized design for Snapdragon

- Larger Out-of-order execution window
- Optimized data prefetch for better efficiency

Private per core L2 cache + Shared L3 Cache + System Cache

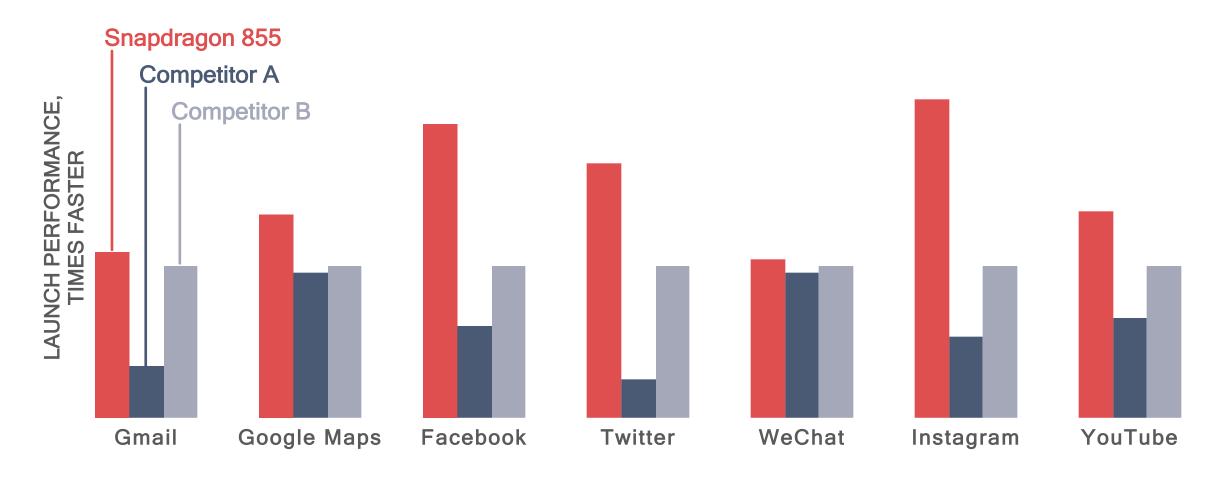

Kryo 485 Performance Biggest Leap for Snapdragon

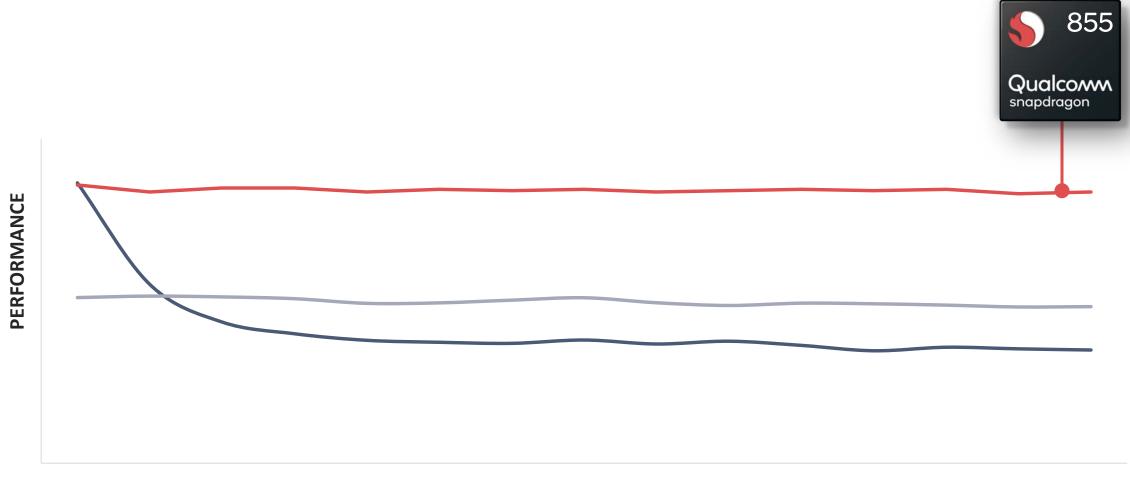

Fastest processor for the apps you use most often

App launch performance compared to other 7nm mobile processors

Sustained System Performance

Versus Competitor 7nm

Hexagon 690

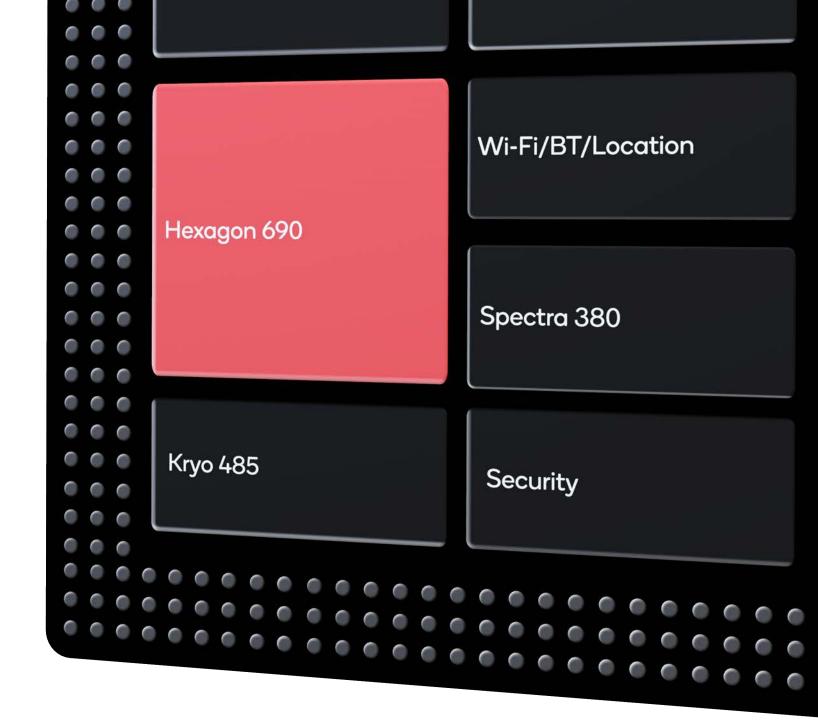

Enabling partner innovation

Qualcomm designed

Over 10 billion DSPs shipped for established software ecosystem

Powerful combination of classic DSP + AI processing

Secure DSP processing

Hexagon 690

1.2x Scalar Performance

Quad threaded

2x Vector eXtensions Performance

- Al and conventional image processing
- 4 Vector extensions

New Tensor Accelerator

- Qualcomm designed
- Dedicated to Al
- Multidimensional math and integrated nonlinear functions

Tensor Accelerator accelerates higher order computation used in Al

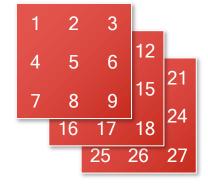

Vector
1st order Tensor

Matrix
2nd order Tensor

Tensor4th order Tensor

Snapdragon 855 Performance highlights

45% Kryo CPU performance increase, biggest leap ever in Snapdragon performance

20% Adreno GPU performance increase with industry leading power efficiency & Vulkan 1.1 support

New Hexagon Tensor Accelerator dedicated for AI & doubled Hexagon Vector eXtension performance
