Qualcomm Oryon™ CPU

The new CPU leader
in mobile computing

Qualcomm

GERARD WILLIAMS

SVP, Engineering
Qualcomm Technologies, Inc.

Snapdragon and Qualcomm branded products are products of Qualcomm Technologies, Inc. and/or its subsidiaries.

Qualcomm Oryon

Faster than leading ARM- compatible competitor

CPU Peak Performance is based on the geometric mean of 100 runs with 60 seconds in between runs utilizing Geekbench v6.2.1 in October 2023.
Qualcomm Oryon was tested using a Qualcomm laptop reference design running Linux OS build Kernel 6.5.0-rc1 Debian Trixie/sid. The M2 Max was
testing using an Apple MacBook Pro 16" 2023 (A2780-8103) 12/38C + 32GB laptop running MacOS. Power comparison reflects power as measured on
both instrumented devices while running at the peak CPU performance of the M2 Max.

PERFORMANCE REBORN

Qualcomm Oryon

Game-changing performance

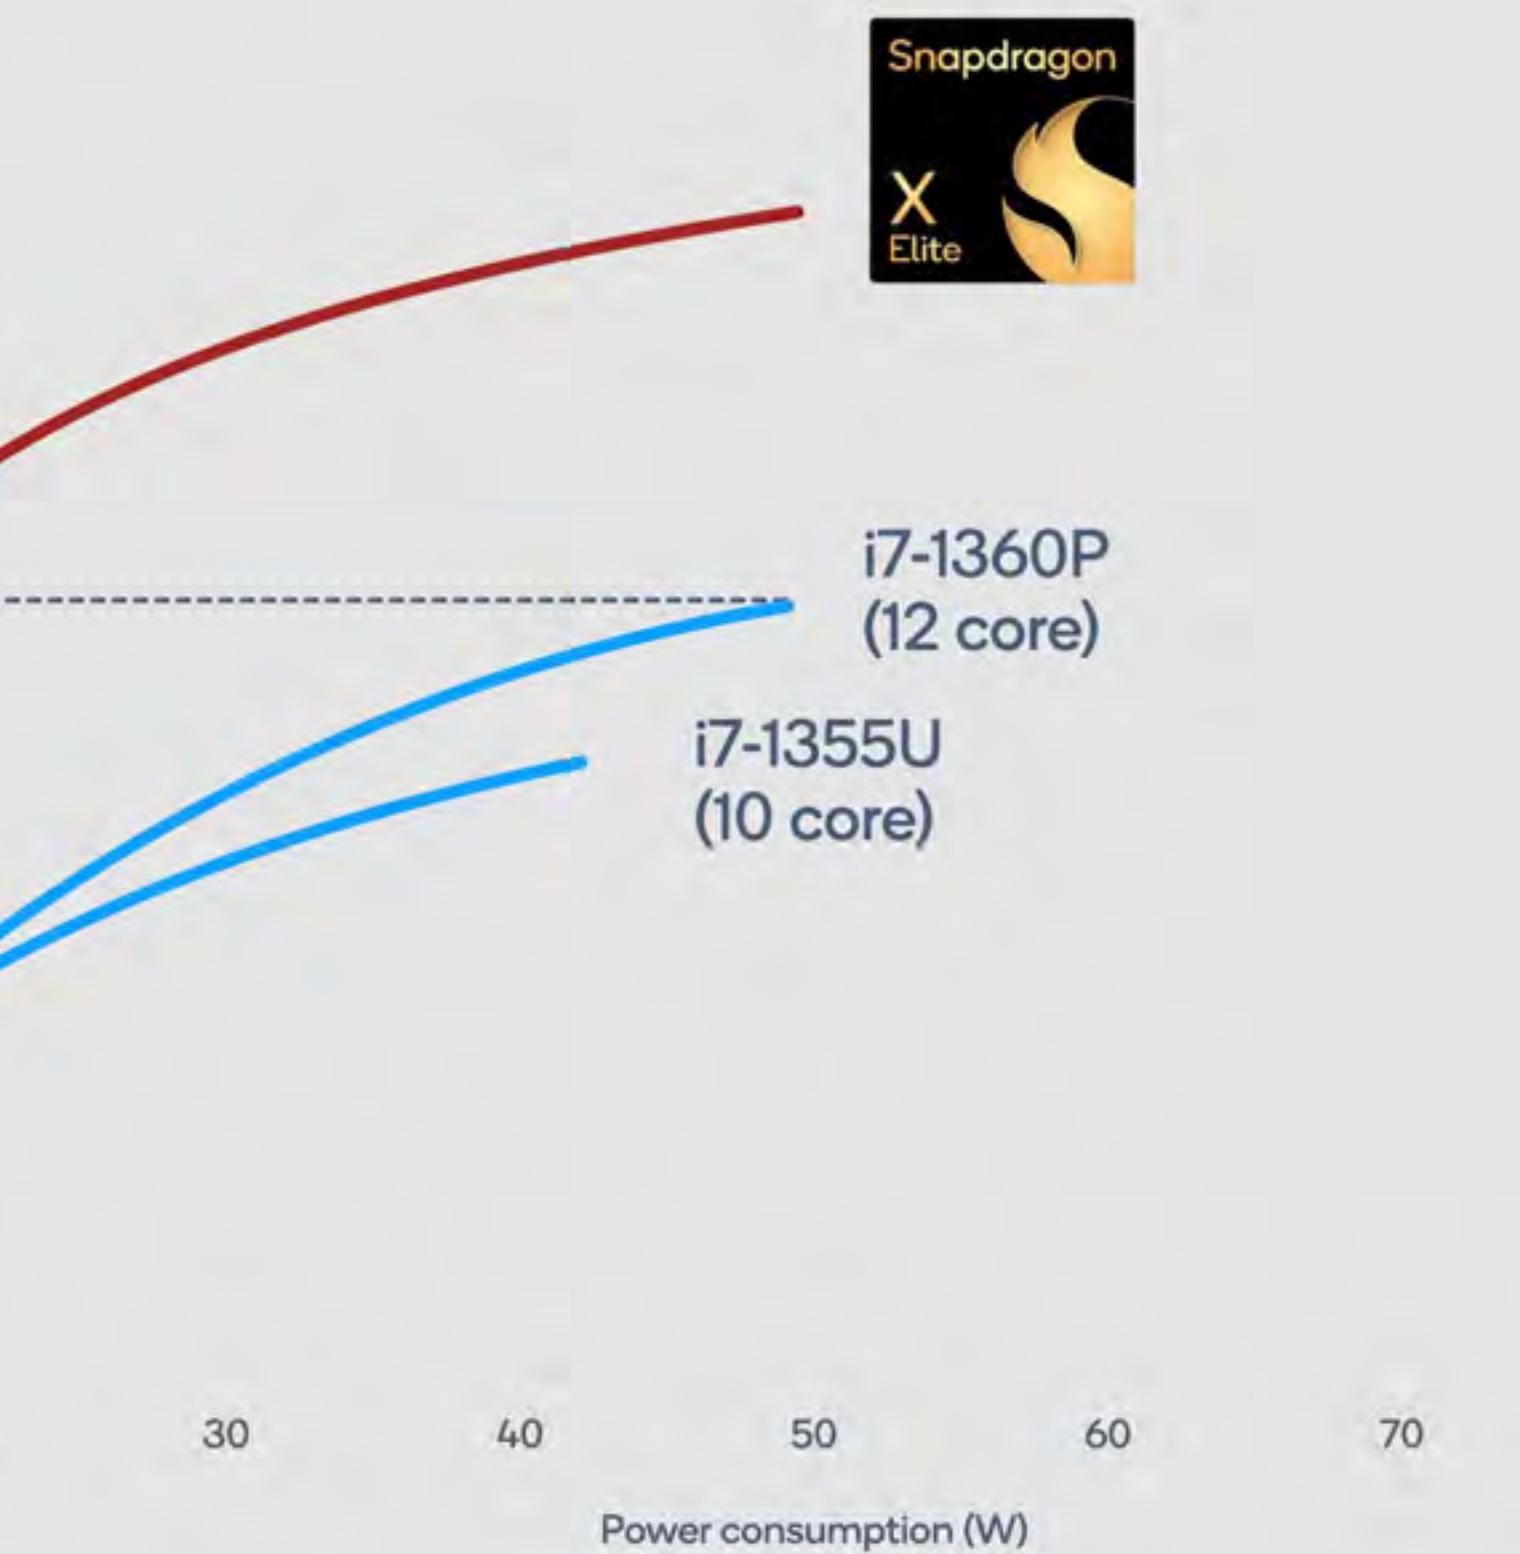

Snapdragon X Elite

Best-in-class CPU

Multi-threaded performance

CPU Performance is based on Geekbench v6.2 Multi-Thread on Windows OS run in October 2023. Snapdragon X Elite was tested using a Qualcomm laptop reference design on Windows OS. The i7-1360P (12 core) and i7-1355U (10 core) were tested using a Samsung Galaxy Book3 360 13" 2023 (NP730QFG) laptop and Samsung Galaxy Book3 15.6" 2023 (NP750XFG) laptop, respectively on Windows 11. Maximum performance reflected by i7-1360P and i7-1355U represent maximum achievable results in given platforms under unconstrained PL1/PL2 settings and no thermal limitations. Power and performance comparison reflects results based on measurements and hardware instrumentation of given devices.
