

Qualcomm Technologies helps empower cities worldwide to provide smart, efficient, and sustainable services.

LinkNYC

Free Public Wi-Fi

Enjoy super-fast Wi-Fi at up to gigabit-class speeds, powered by a Qualcomm Internet Processor and Qualcomm VIVE Wi-Fi technology.

911 Emergency

Easily connect to first responders who can track individual Link locations via cellular abilities using a Qualcomm Technologies' 3G modem.

City Services & Digital Displays

A Qualcomm Snapdragon processor powers the interactive displays and the built-in Android tablet, allowing users to browse the Internet and access city services.

USB Charging

Each Link features Qualcomm Quick Charge enabled USB charging ports, allowing Quick Charge 2.0 enabled devices to charge up to 75% faster than conventional charging.

Public-private partnership between the NYC Mayor's Office of Technology Innovation, DoITT, and CityBridge.

Qualcomm Technologies
This world leader in Wi-Fi, 3G, and 4G technologies will help ensure LinkNYC supports the latest technology, especially as it relates to wireless connectivity.

Intersection
Intersection is a technology and media company that's dedicated to improving the urban experience. The company creates new products and services and invests in the most engaging media platforms that enable cities, businesses and communities to drive engagement, innovation and revenue.

CIVIQ Smartscapes
Specializing in the design and manufacturing of interactive communications solutions that withstand rugged environments, CIVIQ will design, engineer, and manufacture the Links to create durable, robust, and reliable structures.

LinkNYC is a first-of-its-kind communications network that will bring the world's fastest, free municipal Wi-Fi to millions of New Yorkers, small businesses, and visitors in all five boroughs.

• Qualcomm Snapdragon and Qualcomm Quick Charge are products of Qualcomm Technologies, Inc.
• Qualcomm Internet Processor and Qualcomm VIVE are products of Qualcomm Atheros, Inc.
