

## Display of ordering codes for RF360 products

The ordering code for one and the same product can be represented differently in data sheets, other publications and the website of RF360, or in order-related documents such as shipping notes, order confirmations and product labels.

**The varying representations of the ordering codes are due to different processes employed and do not affect the specifications of the respective products.**

RF360 ordering codes consist typically of three blocks of characters with a total of 15 characters. These 15 characters are used to designate the technical specifications of a product.

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15

Block 1	Block 2	Block 3
Is always 6 characters long.	Is max. 5 characters long.	Is max. 4 characters long
Starts with 1 letter, followed by 5 digits.	Starts with 1 letter, followed by up to 4 digits.	Starts with 1 letter, followed by up to 3 digits.
Designates the product family.	Typically designates technical parameters of the respective product.	Typically designates technical parameters of the respective product.

The codes in blocks 2 and 3 can be represented differently. The following examples illustrate the variable representation of the same product

### Variant 1:

The ordering code can contain blanks in blocks 2 and 3 (characters 8, 9 and 13 in example below).

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
B	3	9	1	2	3	R			1	2	P		1	2

# Display of ordering codes for RF360 products

## Variant 2:

The ordering code can contain zeros as placeholders in blocks 2 and block 3 instead of blanks (characters 8, 9 and 13 in example below).

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
B	3	9	1	2	3	R	0	0	1	2	P	0	1	2

## Variant 3:

The blanks in blocks 2 and block 3 may be deleted. In this case the shortened ordering code has fewer characters. In the example below, the ordering code has 12 characters instead of 15.

1	2	3	4	5	6	7	8	9	10	11	12
B	3	9	1	2	3	R	1	2	P	1	2

## Variant 4: Extension of the ordering code with a fourth block of characters

Ordering codes can be extended with a fourth block with a maximum of 3 characters. Block 4 is used by RF360 internally for differentiation purposes and can designate, e.g. the production site of the respective product. Block 4 never contains any information related to a technical parameter of a product.

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18
B	3	9	1	2	3	R	0	0	1	2	P	0	1	2	X	X	X

Block 1

Block 2

Block 3

Block 3

Is max. 3 characters long

Is used by RF360 internally for differentiation purposes

Further information about the ordering codes for certain product groups can be found in product-related documents.
