HomePlug® Powerline is ideal to deliver high-speed wired and wireless internet to every room in the home using existing electrical wiring.

Just 2 simple steps for a reliable internet connection:

1. Plug: Insert the HomePlug adapter into a wall outlet.
2. Connect: Plug the HomePlug adapter into a device.

Building construction can cause your home to work against your network, not the case with HomePlug Powerline.

HomePlug AV reaches speeds up to 200 Mbps.
HomePlug AV2 reaches speeds up to 500 Mbps to 1 Gbps.

Performance is in the House.

Powerline (PLC) is also a key ingredient in hybrid networks.

Hybrid products allow you to easily extend your wireless network.

Don’t forget: Look for the HomePlug certification mark when purchasing your Powerline products.
